Capability Recency:
To ensure Microsoft partners can deploy, recommend, sell and service the latest Microsoft technology in market to meet customer demand, beginning October 2010, partners who choose to attain a competency will need to pass exams based on the latest Microsoft product version in market (unless otherwise noted). Partners can expect exams based on older product versions to be retired after a replacement exam is published in our available language set. Partners will be provided adequate notification prior to retirement. After an exam is retired, partners have until their membership renewal date to take and pass new exam(s) in order to maintain their competency or Gold competency.
